School Self Evaluation Form

School Name: _____

Person completing the form: _____

Other school personnel involved: _____

Please use the checklists in your folder to identify the work completed and name other activities you have done. Provide evidence of your work for each step in the folder.

Complete this form and give it to the assessment team when they visit your school, along with your Yellow Flag folder.

This 'self evaluation questionnaire' is intended to allow the Link Teacher, along with other stakeholders to reflect on their Yellow Flag experience. It is best, if the questions on the sheet can be discussed with the Diversity Committee and others involved in the process.

The Yellow Flag team don't expect that everything will have gone perfectly. Becoming a more intercultural school is a learning experience for everyone involved. It can sometimes meet resistance from teachers, students or parents for a variety of reasons. Taking on these struggles will show that you are trying to change things.

Remember to talk about the 'hidden work' as well as the big events. Sometimes the relationships you have been quietly building or knowledge you have gained can have the most impact. What has changed about the school culture to value the differences within the school population? Talking about the problems you have faced and the learning you have gained is a great way of showing how you are growing as an intercultural school.
